SUMMARY

B. Tech student in AI & DS with a strong interest in Data Science and Full-Stack Web Development. Skilled in Java, Python, SQL, and modern frameworks with hands-on experience in ML, NLP, and interactive web apps.

EDUCATION

Galgotias University

Greater Noida, India

- *B. Tech in Artificial Intelligence & Data Science*

Oct 2023- May 2027

SKILLS

- **Language:** Python, Java, SQL, CSS, JavaScript
- **Framework:** Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn, Django, Node.js, Express.js
- **Tools:** Power BI, Excel, MySQL, Tableau, Firebase, Git/GitHub
- **Platform:** Visual Studio Code, PyCharm, Jupiter, IntelliJ IDEA
- **Soft Skill:** Analytical Thinking, Problem Solving, Adaptability

EXPERIENCE

TeleCare – AI-Powered Telemedicine Platform | Sep 2025

Project | AI & Full-Stack Development

- Built an **AI-powered telemedicine platform** connecting rural patients, doctors, pharmacies, and health authorities.
- Implemented **AI symptom checker** and **predictive analytics** for emergency prioritization, disease outbreaks, and medicine shortages.
- Outcome: Enabled online consultations, e-prescriptions, remote diagnosis, and patient history tracking.
- Developed centralized dashboards for monitoring disease trends and healthcare resource availability.
- **Tech Stack:** React.js, React Native, Tailwind CSS, Node.js, Express.js, MongoDB, Python, scikit-learn, PyTorch, NLP, OCR, WebRTC, Socket.io, Recharts / D3.js, Docker, Cloud (AWS / Azure / GCP)

PROJECTS

Chatbot Application

Dec 23 – Jan 24

- Built a rule-based chatbot with a GUI for user interaction
- Used basic NLP logic to simulate conversational flow
- **Tech Used:** Python, Tkinter, Flask, NLP (Transformers), Firebase, React.

Credit Card Fraud Detection System

May 25 -Jun 25

- Applied ML models to detect fraudulent transactions
- Performed EDA, preprocessing, and model evaluation
- Outcome: Improved fraud detection accuracy by 92%.
- **Tech Used:** Python, Pandas, Matplotlib, Seaborn, Scikit-learn

AceMe – AI-Powered Interview Platform

Jun 25 – Jul 25

- Developed a full-stack platform with Flask and JS for mock interviews.
- Integrated ML models for **speech & grammar analysis** with real-time feedback.
- Built secure **auth, resume parsing, and analytics** modules with scalable REST APIs.
- Outcome: Enabled users to simulate mock interviews with real-time AI feedback
- **Tech Used:** Python, Flask, NLP (Transformers), Speech-to-Text (Google Cloud), Firebase, React, TensorFlow.

CERTIFICATES/ACHIEVEMENT

- **Programming in Python– Meta** | Jan - 2024
- **Data Analytics – IBM** | May -2025
- **Oracle SQL– Oracle Academy** | Nov - 2024
- **Remote Sensing Data Analytics Crop Production Forecasting - ISRO** | June - 2025
- **Runner up in BuildThon** | Nov - 2025
- **Selected for IOS Bootcamp** |Aug - 2025
- **Full Stack Developer Bootcamp –GFG** |Jul - 2025
